

MINUTES

1. Report of the Chair - Dr Shlomo Zusman (Chair)

a. Section activities

-close collaboration continues with FDI Public Health Committee, as well as with the International Federation of Dental Educators and Associations (IFDEA) and the International Association of Dental Research (IADR)

b. 2019 Joint PHC/CDO Forum program

-our Section supports tomorrow's session, *Building sustainable international public health programs*, Chaired by PHC Member Dr Marshall Gallant. All Section Members are encouraged to attend, and to themselves consider presenting in this Forum in future years.

c. CDO/DPH Section collaboration with WHO Oral Health Unit

-close collaboration continues with the WHO Oral Health Unit
-Section CDOs are encouraged to join the WHO Dental Officer's on-line discussion platform
-Section CDOs attended this morning's WHO Global Oral Health Programme Meeting

2. Report of the Secretary - Dr James Taylor (Secretary)

a. 2019 Master Schedule (attached)

-discussed and distributed

b. Section election

-the 2019 Section Election was conducted in accordance with our FDI Section Bylaws
-the following Section Executive slate was elected unanimously:

POSITION	NAME	COUNTRY
Chair	Shlomo ZUSMAN (2 nd term)	Israel
Secretary	James TAYLOR (2 nd term)	Canada
Member	Hiram LOCKHART (2 nd term)	Bahamas
Member	CHNG Chai Kiat (1 st term)	Singapore
Member	Sara HURLEY (1 st term)	United Kingdom

-the Chair welcomed our new Board Members, and thanked the outgoing Board Members, Yvonne Buunk-Werkhoven (Netherlands) and Kitty Mei-Yin Hse (Hong Kong SAR), for their service on the Executive.

3. Report of the WHO Oral Health Unit- Dr Benoit Varenne (WHO Dental Officer)

- Dr Varenne gave an overview of the status of oral health within WHO NCD and UHC agendas in the context of the UN Sustainable Development Goals, and previewed the UN High-Level Meeting on UHC which will take place on 23 September 2019
- he also reviewed the proceedings of this morning's 2019 WHO Global Oral Health Programme Meeting for CDOs (report attached)

4. Report of the Alliance for a Caries Free Future – Dr Nigel Pitts (ACFF Global Chair)

- Dr Pitts joined the meeting to discuss Saturday's ACFF Summit, entitled *Potential synergies in practice between CariesCare 4D caries management and the "new classification of periodontal disease"*
- he also previewed the upcoming (18-19 November, 2019) ACFF Policy Lab, entitled *How Can the Oral Health and Dental Industries Benefit from Enabling Positive Behaviour in Caries Prevention and Control Amongst Patients and the Public?* (poster attached)
- ACFF looks forward to continuing to work in close collaboration with our Section

5. Other business- Dr Shlomo Zusman (Chair)

a. Section communications protocols

- with the webpage now functional for over two years, the Section will no longer be communicating by email blasts; indeed, such communications are not legal in some jurisdictions, and most specifically not in the EU
- Section Members shall please continue to watch the website for updates

b. Section webpage content

- CDOs (and their respective National Dental Associations) are asked to periodically check the Global CDOs List and advise the Secretary if there are any changes in their jurisdiction

c. Next meeting

- our Section looks forward to seeing all our Members for our 2020 Business Meeting, to be held during the 2020 FDI WDC in Shanghai, PRC, 01-04 September 2020

Dr James Taylor
Section Secretary
james.taylor@phac-aspc.gc.ca

 Chief Dental Officers/
 Dental Public Health

SECTION MASTER SCHEDULE

Thursday/Friday/Saturday 05/06/07 September 2019

TIME	EVENT	VENUE
Thursday 05 September 08h30-13h30	WHO Global Oral Health Programme Meeting (CDOs only) - <i>Oral health strategic priorities as part of the NCD agenda and UHC initiative in the context of the UN SDGs.</i> Chair: Dr Benoit Varenne (WHO Oral Health Programme Officer)	Intercontinental Hotel Mark Hopkins (999 California St) California Room (Cal. level)
Thursday 05 September 14h00-16h00	CDO/DPH Section Business Meeting Chair: Dr Shlomo Zusman (CDO Israel)	Intercontinental Hotel San Francisco (888 Howard St) Union Square (3rd floor)
Friday 06 September 09h30-12h00	FDI-NCD Alliance-WHO Joint Session - <i>Strengthening inter-professional collaboration: Models to improve the prevention and control of oral diseases and other NCDs</i> (Session #6153) Chair: Jonathon Kruger (World Health Professions Alliance)	Moscone Center South Upper Mezzanine Room 152
Friday 06 September 13h30-16h00	FDI Public Health Committee/CDO Section Forum: <i>Building sustainable international public health programs</i> (Session #6154) Chair: Dr Marshall Gallant (PHC Member)	Moscone Center South Upper Mezzanine Room 152
Saturday 07 September 08h30-11h00	World Oral Health Forum – <i>Universal health coverage: The good, the bad, and the necessary for oral health</i> (Session #7155) Chair: Victoria MacDonald (UK Channel 4 News)	Moscone Center South Level 2 Room 208
Saturday 07 September 11h00-13h00	ACFF Tenth Annual Summit - <i>Potential synergies in practice between CariesCare 4D caries management and the “new classification of periodontal disease”</i> Chair: Prof Nigel Pitts (ACFF Global Chair)	Intercontinental Hotel San Francisco (888 Howard St) Ballroom BC

CDO/DPH Section Secretary: Dr James Taylor (Canada) james.taylor@phac-aspc.gc.ca

PAHO/WHO & WHO Oral Health Program

*Oral Health Side Event during the FDI World Dental Congress
Meeting Report
San Francisco, CA., September 5, 2019*

Background

Universal Health Coverage (UHC) encompasses the full spectrum of essential, quality health services, from health promotion to prevention, treatment, rehabilitation and palliative care. The World Health Organization (WHO) defines UHC as ensuring “all people have access to health services and do not suffer financial hardship paying for them”¹. With regards to oral diseases this translates to ensuring: 1) integrated essential oral health services; 2) oral health workforces geared towards population health needs and the social determinants of health and 3) financial protection and expansion of fiscal space for oral healthcare.

Despite the progress made towards achieving UHC, at least 400 million people still lack essential health services and 100 million people are forced into extreme poverty due to high health expenses each year. Oral health is essential to a good quality of life. However, like many other health services, basic oral healthcare remains out of reach for millions of people. Oral diseases are increasingly common in low- and middle-income countries and the burden is much higher among disadvantaged populations worldwide.

Oral diseases are the fourth most expensive disease to treat in terms of out-of-pocket expenditure². It is also a major drain on limited personal resources for the most vulnerable groups and increases risks of poverty and further illness. In many low- and middle-income countries (LMICs), coverage, availability, and access to oral health care—including early diagnosis, prevention, and basic treatment—are grossly inadequate or completely lacking. Furthermore, oral health has often been neglected in national health plans and global health strategies.

To improve oral health outcomes and reduce inequalities in access to care across the life course, it is necessary to integrate essential oral healthcare into UHC. Oral health is important for overall health, well-being, and quality of life and shares common biological, behavioral, and psychosocial risk factors with various other NCDs. As with other chronic diseases, there are widespread oral health inequalities not only in oral health outcomes but also in access to oral health care. The Global Burden of Disease Study 2016

¹ https://www.who.int/health_financing/universal_coverage_definition/en/

² WHO (2018). Retrieved from <https://www.who.int/news-room/fact-sheets/detail/oral-health>

estimated that oral diseases affect half of the world's population. Nevertheless, oral health is a neglected area of global health that could contribute to achieving universal health coverage.

The past decade has seen an increasing recognition of the global importance of NCDs and the need for an integrated policy response within national health programs. UHC can help frame policy dialogue to address weak and fragmented primary oral health services, as well as substantial out-of-pocket expenses associated with oral health care in many countries, which in turn would help achieve UHC.

To ensure the availability of equitable, affordable, and accessible oral health services for all, oral health systems need to overcome several challenges, such as: a) shortages of appropriately trained dental personnel; b) inadequate outreach to rural and other underserved populations; c) treatment costs that are too high for many poor and marginalized people; d) inadequate transportation and lack of appropriate technologies; e) isolation of oral health services from the broader health system, especially among LMICs; and f) limited adoption of prevention and oral health promotion. These barriers make it difficult for vulnerable populations, including the poor, ethnic minorities, and the disabled, to access fair and equitable oral health care.

Purpose of the Meeting

The Pan American Health Organization/World Health Organization (PAHO/WHO) and the WHO's Oral Health Program convened a side event in San Francisco, California on September 5, 2019, in alignment with the annual FDI World Dental Congress that also took place this day, and several key dental public health actors, including Chief Dental Officers from around the world, participated in the event.

The objectives of this side event were to strengthen the collaboration among Chief Dental Officers, Heads of WHO Collaborating Centers (WHO CCs) and PAHO/WHO Member States, and to discuss the commitments towards oral health strategic priorities as part of the NCD agenda and UHC initiative in the context of the Sustainable Development Goals (SDGs). In addition, inputs from countries on the draft Global Oral Health Report, including oral health country profiles, were presented and discussed among participants.

The WHO Global Oral Health Programme has started to develop a new Global Oral Health Report (GOHR) - the previous one was published in 2003 and an updated and robust advocacy document is needed to reinforce the commitment to oral health at the global level, and pave the way for the further development of global policy guidance.

The report aims to serve as a reference for policymakers and provide orientation to a wide range of stakeholders across different sectors and guide the advocacy process towards better prioritization of oral health in global, regional and national contexts.

Expected outcomes:

1. Share priorities, experiences and lessons learned within the region of the Americas.
2. Provide input on the draft Global Oral Health Report.
3. Strengthen collaboration and partnership among CDOs, WHO Collaborative Centers and WHO.

Introduction and Welcoming Remarks

PAHO/WHO and the WHO Oral Health Program welcomed and thanked the Chief Dental Officers from countries around the world for being present at the meeting, and specifically acknowledged those from the Region of the Americas, not only for accepting the invitation, but also for providing a picture of the current situation of oral health in the Region.

Chief Dental Officers and Country nominees from St Lucia, Turks and Caicos, Belize, Suriname, Bahamas, Trinidad and Tobago, El Salvador, Guatemala, USA, and Canada were the main actors in this meeting. The FDI, IADR and CDO's from the UK, Italy, Japan, Malaysia, Czech Republic and the WHO CCs from Japan, China and New York University (NYU) were also present during the side event and shared experiences and provided ideas for collaboration.

The importance of oral health for general health was emphasized, as well as the need to find innovative and hands-on solutions to reach the most vulnerable, leaving no one behind, and to pursue the vision of Universal Health in the context of the Sustainable Development Agenda and the SDGs.

Participants stressed that basic oral healthcare, like many other health services, remains out of reach for millions of people globally, especially in low and middle-income countries where the burden of oral diseases is much higher among disadvantaged populations. And despite the fact that oral diseases are among the most common diseases worldwide, they continue to be a neglected topic on the global health agenda. In this area, countries have significant work to do in order to achieve Universal Health.

Main Challenges Countries are Facing

Topic Area	Problem	Moving forward
Work force	<ul style="list-style-type: none"> • Insufficient dentists to population ratio • Rural areas under-covered • Constrictive staffing structure in the public sector? 	<ul style="list-style-type: none"> • Decentralization of oral health services in alignment with general health services • Use of dental therapists
Funding	<ul style="list-style-type: none"> • Underfunded • Limited budget for human resources • Operational funding to finance oral health initiatives has been reduced and inadequate 	<ul style="list-style-type: none"> • Robust oral health planning
Education	<ul style="list-style-type: none"> • Dental curriculums are not designed to the current health population needs 	<ul style="list-style-type: none"> • Review procedures and protocols with a more results-based focus • Develop health education activities related to NCDs and conduct sessions of continuing education development for health care providers
Access to oral health care	<ul style="list-style-type: none"> • Limited services • Need to align oral health care and NCDs approaches • Limited access 	<ul style="list-style-type: none"> • Improve access by Service delivery remodeling • School oral health programs- Oral health component of the Chronic Care Passport
Data availability	<ul style="list-style-type: none"> • Por research and data to justify decision-making • Lack of surveillance of oral diseases; encounter data exists but it has not been analyzed 	<ul style="list-style-type: none"> • Redefine oral health indicators, develop and implement a surveillance system for results-based monitoring and evaluation

The Global Oral Health Report

The final version of the political declaration on Universal Health Coverage was released and will be adopted during the first session of the UN High-level Meeting on Universal Health Coverage. In the political declaration, and for the second time, oral health is mentioned. This time, paragraph 34 emphasized the need to “*strengthen efforts to address eye health conditions and oral health, as well as rare diseases and neglected tropical diseases, as part of universal health coverage.*”

Top priorities and Commitments

1. Robust oral health planning in WHO regions
2. Surveillance
3. Education: task-shifting, cross training and a workforce tailored to the current health needs, as well as updated curriculums for dental education
4. Improved and more frequent risk assessments
5. Funding

Potential Areas for PAHO Assistance:

- Surveillance
- Prevention
- Workforce training

List of Event Participants

Name	Country	Affiliation
RADM Tim Rick	US	US Public Health Service/IHS
CCDR Grant Abernethy	US	US Public Health Service/US Coast Guard
Jessurun Derrick	Suriname	Suriname Dental Association
Dr Raphael Samos	Belize	Ministry of Health

DENTAL POLICY LAB

18/11/19 – 19/11/19

Change is
Coming
Within the
Dental
Sector.

With the acceptance and understanding of dental caries as a disease continuum, and wider awareness of the preventable nature of cavities, strides are being taken by governments, dental professionals and the public to ensure a future where dental cavities are not an inevitability of life. But what does this shift mean for dental industries? How can we harness this shifting tide and ensure sustainability and thriving across a changing dental landscape and market, whilst ensuring that the Oral and Dental Industries can also benefit the patients and the public?

Join us as we take a deep look into the question:

“ **How can the Oral Health and Dental Industries benefit from enabling positive behaviour in caries prevention and control amongst patients and the public?** ”

“The Dental Policy Lab is helping to accelerate reform in the dental care sector in many countries aimed at improving population oral health. This unique partnership is not only inspiring, but it will have a lasting impact on dental care systems around the globe.”

— Dr Marko Vujicic, Chief Economist & Vice President,
Health Policy Institute, American Dental Association

DENTAL POLICY LAB

18/11/19 – 19/11/19

This innovative ‘Policy Lab’ meeting offers the opportunity for representatives from world leading dental industries to come together and work to shape the next steps in the evolution of the dental sector.

Taking place over 24-hours spread over two days, participants will have the opportunity to hear from leading figures in dental psychology, behaviour change and policy, before drawing together to formulate ideas which can be used as catalysts for change within their sectors.

EVENT BEGINS:

16:00, Monday 18th
November 2019

EVENT ENDS:

16:00, Tuesday 19th
November 2019

EVENT LOCATION:

Wallacespace Spitalfields,
London E1 7HA

Please contact admin@acffglobal.org for further information

We would love for you to join us at this internationally regarded event to take your place at the forefront of the strategic discussions and help to shape the direction of future travel for the dental industries.

This meeting is the third in a series of Policy Lab events hosted by the Alliance for a Cavity-Free Future in association with King's College London Faculty of Dental, Oral and Craniofacial Sciences and the Policy Institute at King's. For further information about previous meetings and to read the reports, please visit www.acffglobal.org/policy-network

“A meeting like this is important because it really brings in all these fresh, new ideas and it opens up our eyes to possible solutions that we may not have thought of previously.”

— Dr Chng Chai Kiat, Chief Dental Officer, Singapore

The Policy Institute at King's
